

Skipper 150 Fleet Broadband

The Skipper 150 belongs to a new class of entry-level performance Fleet Broadband systems suitable for users needing moderate data speeds up to 150 kbps while at sea.

The **Skipper 150** is based on the widely used Inmarsat satellite technology and makes it easy to talk, send/receive SMS, access e-mail or browse the internet. With data speeds up to 150 Kbps you can receive full color weather images, navigation charts, or maintenance information. You can talk simultaneously while sending reports, regulatory information, requisitions, or browsing the internet. The Skipper 150 also includes a GPS receiver and can output NMEA 0183 formatted messages to provide accurate location information to onboard systems.

PREPAID INTERNET ACCESS:

With the Skipper 150, you can easily receive weather images or navigation charts using high speed internet access. Outfitter Satellite offers prepaid internet: there is no monthly fee for internet-only customers – just purchase additional prepaid internet access as needed.

VOICE COMMUNICATIONS:

Optional voice communication is available with conventional monthly billing. An RJ-11 phone port lets you use the Skipper 150 with standard phone equipment. There is no reason to get off the internet to make a phone call. You can talk simultaneously while sending reports, regulatory information, requisitions, or just browsing the internet.

GPS CAPABILITIES:

The Skipper 150 includes a GPS receiver and can output NMEA 0183 formatted messages to provide accurate location information to onboard systems.

Features:

- Simultaneous voice and data
- Data speeds up to 150K bps
- Handset with large color LCD display
- RJ-11 port for standard phone
- GPS receiver supports NMEA-0183 output

Specifications:

- **Services:** Voice; Standard IP; SMS
- **Antenna Size:** 11.6 in. (Dia.) x 8.7 in. (high); 294 mm (Dia.) x 221 mm (high)
- **Antenna Weight:** 5.5 lbs (2.5 Kg)
- **Below Deck Unit Size:** 11.3 in. x 9.0 in. x 2.7 in. (287 mm x 229.6 mm x 69.7 mm)
- **Below Deck Unit Weight:** 6.2 lbs (2.8 Kg)
- **Interfaces:** 10Base-T with PoE (RJ-45); IP Handset (RJ-45); RJ-11 std. phone port
- **Power:** +10.8V - +31.2V DC; 100 Watts maximum including antenna
