

# ThurayaIP Data Terminal

Internet connectivity throughout the Thuraya coverage region.

## ThurayaIP Satellite Data Terminal

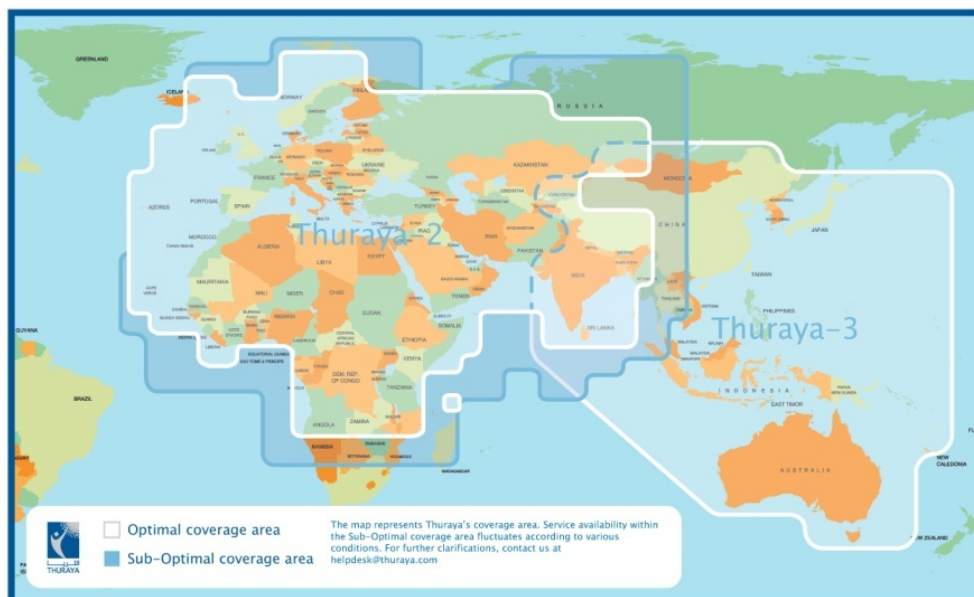

The ThurayaIP Satellite modem is a small, lightweight terminal that provides up to 444 Kbps internet connections, as well as up to 384 Kbps streaming IP connections. Outfitter Satellite offers a prepaid internet access solution for customers that do not need streaming IP data. A graphical user interface makes the ThurayaIP terminal easy to set up and use. There is no software required on your PC to configure the satellite modem, or to setup an internet connection. The rugged design allows the unit to be used in rough environments with extremes of heat, cold, dust, wind, and rain. An optional external antenna allows the user to be indoors while the antenna is outdoors up to 33 feet (10 m) away.

- High-speed data transfer up to 444 kbps
- Support for streaming IP at 32, 64, 128, 256, 384 Kbps (384 Kbps requires external antenna)
- User friendly graphical user interface (GUI)
- Splash and dust proof design
- Robust, reliable and durable
