

Thuraya SG-2520

This Satellite-GSM Camera phone is loaded with features but very compact.

The SG-2520 is sleek and modern in design. Weighing only 6.3 oz with a mere 5.5" height, the Thuraya SG-2520 has redefined the perception of satellite handsets by being as manageable as a small cellular phone.

The Thuraya SG-2520 boasts many features historically only associated with cellular handsets. It offers both Thuraya satellite communications and GSM cellular mode (900, 1800, and 1900 MHz) integrated with GSP location technology. GPRS lets you access the internet over satellite in Thuraya's entire coverage area or in the three GSM cellular modes.

The SG-2520 has a **1.3 megapixel camera** with 5x digital zoom. You can send photos as an email attachment or MMS. A streaming media feature lets you play video clips in real time on the phone's high resolution, 262,000-color display. Standard features also include USB port, fax and data at 9.6 kbps, SMS. GmPRS "always on" fast internet is also supported. All this, plus up to 4.0 hrs of talk time in GSM and 2.4 hrs of talk in sat mode or up to 40 hrs of standby time, makes the SG-2520 the satellite phone of choice in many parts of the world.

Kit includes: phone, external 128 MB SD Memory Card, earset, battery, AC charger (110/220 VAC, 50/60 Hz), USB data cable and manual.

Options include: Pelican case, solar charger, car dock, and FDU-3500 docking station for in-building use.

Thuraya offers satellite voice, SMS, and data services over a large region of northern, central, and western Africa, plus the Middle East, Asia, the Indian Subcontinent, Indonesia, and Australia.
